

OpenClaw Scheduled Tasks

OpenClaw Scheduled Tasks

1. Course Content
 - Course Objectives
2. Introduction to OpenClaw Scheduled Tasks
3. Preparation
4. Demo Cases
5. Viewing and Managing Scheduled Tasks

1. Course Content

- OpenClaw Scheduled Tasks is the task automation scheduling function of the OpenClaw platform, allowing users to create timed robot tasks

Course Objectives

1. Understand the functions and application scenarios of OpenClaw Scheduled Tasks
2. Master the method of creating scheduled tasks through natural language
3. Master the operations of viewing, managing, and maintaining scheduled tasks

2. Introduction to OpenClaw Scheduled Tasks

- Scheduled Tasks are OpenClaw's intelligent scheduling function. Users can create scheduled tasks to have the robot automatically perform specific operations at a specified time or interval
- After creating a scheduled task, OpenClaw automatically executes the task instructions according to the set time and records a run log for each execution

3. Preparation

```
ros2 launch microros_v2_bringup openclaw_service.launch.py
```

- In the scheduled task list, the following management operations are supported:
 - Enable/Disable:** Control whether the scheduled task takes effect with a switch; once disabled, the task will no longer run on schedule
 - Run now:** Manually trigger a scheduled task once to quickly verify whether the task works properly
 - Delete:** Delete scheduled tasks that are no longer needed
- Click a scheduled task to view and edit its details, including the task description and execution plan
- In **Run History**, you can see the execution records of each scheduled task trigger, including execution time, execution status, and run result

Open run chat

The scheduled task was triggered and executed successfully:

Move (Forward 0.5 m): ☒ Success — Target distance reached

SeeWhat (Environment Capture): ☒ Success — Image captured and saved

Both commands returned successfully with normal communication and hardware status.

Status: The robot's network connection and system states are operating normally. Ready for the next instruction.
